

# **CALDERDALE VOTES**

40 years of local democracy

Calderdale Metropolitan Borough Council was 'born' on 1<sup>st</sup> April 1974 by amalgamating the county borough of Halifax, the boroughs of Brighouse & Todmorden, the urban districts of Elland, Hebden Royd, Ripponden, Sowerby Bridge & part of Queensbury and Shelf and the rural district of Hepton. The first elections to the council were held on Thursday 10<sup>th</sup> May 1973 (the shadow authority) and to celebrate 40 years of local democracy this statistical digest has been compiled.

## Notes

Results - given by year, votes and percentage share (for the highest polling candidates in multiple contests). Female candidates are designated by the title 'Ms' for simplicity. Turnout figures not provided for individual wards because of too many discrepancies. Despite my very best efforts a name may have been misspelt and I apologise if this is the case. The results have been sourced from local newspapers and libraries.

A \* before a candidate's name highlights that they are an incumbent councillor for the ward.

A + before a candidate's name highlights that they are an incumbent councillor but have chosen to seek re-election in another ward.

No incumbents in 1973 because inaugural election or 2004 'all out' election because of boundary changes.

By-Elections - I have noted the retiring councillor (either resignation, death or extended absence).

Cycle of Election - Each column should be read downwards. Normally each councillor serves a four year term but it is possible for an incumbent councillor to move to a different cycle e.g. when they seek re-election and are placed 2<sup>nd</sup> in a double vacancy. In 1973 the top three candidates were elected in each ward. The highest polling serving until 1978, the second highest polling until 1976 and the third highest polling until 1975.

In 2004 the top three candidates were elected in each ward. The highest polling serving until 2008, the second highest polling until 2007 and the third highest polling until 2006.

If a councillor switches allegiances this is noted in brackets.

Table of Majorities - Majority is the guidepost in our plurality electoral system and I have ordered the majorities by year in vote (not percentage) order. The second place party is given in brackets except for CON/LAB and Lab/CON battles. In 1973 and 2004 when 'all out' elections were held I have listed the margin between the 3<sup>rd</sup> and 4<sup>th</sup> placed candidates. This may occasionally provide an anomalous result when both candidates share the same party colours so please treat with caution.

Summaries -including wards changing hands, new council composition, party vote share plus overall turnout percentage.

WYMCC - the results for the Calderdale divisions to the west Yorkshire Metropolitan County Council.

\* Some notes of caution - turnout was boosted in 1979 and 2010 because the local polls coincided with a General Election. 2004 was a postal ballot election, which may have had an effect on the number voting. In 2011 the 'AV Referendum' was held on the same day as the local elections and this may have increased turnout.

Full turnout figures are not available for the 1973 'all out' election and the figure provided is therefore an estimate. There are unfortunately discrepancies for other years so turnout rounded to the nearest whole number.

The % share may not be a true reflection of a party's true standing across the borough because of the number of candidates contesting wards and the possible splits in party support when 'dissident' candidates entered the fray. For the 1973 & 2004 'all out' elections the highest polling candidate's vote is used in the calculation.
